

# Light on the Situation in Some Parts of Southern Sonora

## ADRIAN MARCOR AND WIFE OF ALAMOS, SONORA, ARE BROUGHT TO NOGALES AND DEPORTED, OTHERS WILL BE EXPATRIATED

The Oasis, of Nogales, tells in this week's issue of the arrival in Nogales, of Mr. and Mrs. Adrian Marcor from their home in the Alamos district, with Jose Sandoval and Rafael Rosas, all well known people to many Americans in this part of Arizona who have had business at different times and property interests in the Alamos district. The Marcor story as told in the Oasis is of exceeding interest and follows:

Monday evening there were brought up from the south, on the train from Hermosillo, two well known people of the Alamos District of Sonora, and two others of less conspicuousness in that part of the state, who were traveling under a strong military guard, and upon their arrival at Nogales, Sonora, where they were ordered to cross into the United States, and return not to do so, they were admonished, would be at the penalty of their lives. Three were deported outright, while one, the lady, Mrs. Adrian Marcor, was permitted to accompany her husband, who had been made to feel the displeasure of the constitutionalist authorities in many ways. The four persons mentioned are Mr. and Mrs. Adrian Marcor of Alamos, Jose Sandoval of Huatabampo, and Rafael Rosas of Alamos.

Mr. Marcor has been one of the most prominent Maderistas in Sonora, and that those who claim to be carrying out Maderista principles and policies, should visit upon him so great a penalty as expatriation seems remarkable. From the very inception of the Madero movement Mr. Marcor was an ardent adherent and supporter of the cause. When Madero was traveling through Mexico and urging the people to make a stand against the Diaz administration, upon visiting Alamos he was refused hotel accommodation, and at the risk of the displeasure of the authorities Mr. Marcor extended the hospitalities of his own home, entertaining the daring visitor through a period of several days.

When the Madero cause had triumphed and the new regime had succeeded to power, Mr. Marcor was made prefect of the Alamos District, and he held that important and responsible post through some two years, discharging efficiently and effectively its arduous, strenuous duties. It is related that after the overthrow of Madero and the decision of the State of Sonora to oppose with the force of arms the Huerta administration, Mr. Marcor clashed with some of the subordinate officials in his district who manifested a disposition to commit irregularities in administration and violations of their official trusts. One of the most exalted officials in the constitutionalist regime, clashed with Prefect Marcor, and there were made many disagreeable issues. A presidente raised a force in his own town and marched upon Alamos. Prefect Marcor raised a force to repel the attack, and on March 17th of last year gave battle to the invader, defeating him. Another and larger force was sent against Alamos by the constitutionalists, the

## Throw Away Your Eye-Glasses!

### A FREE PRESCRIPTION

You Can Have Filled and Use at Home.

Do you wear glasses? Are you a victim of eye-strain or other eye-weakness? If so, you will be glad to know that there is real hope for you. Many whose eyes were failing say they have had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it, "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully, now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can even read fine print without glasses. It is believed that thousands who wear glasses can now discard them in a reasonable time and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever needing glasses. Eye troubles of many descriptions may be wonderfully benefited by following this simple rule. Here is the prescription: Go to any drug store and get a bottle of Optonol, fill a two ounce bottle with warm water, drop in one Optonol tablet and allow to dissolve. With this liquid, bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them now before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time.

## ROYAL HUSBAND WANTS A DIVORCE

Princess William of Sweden and her baby.

Prince William, the son of the king of Sweden, has started proceedings for divorce from his wife, the former Grand Duchess Marie Pavlovna of Russia, whom he married in 1908. The affairs of the young couple have been before the public for some time. Friends have tried their utmost to bring about a reconciliation of the royal pair, until the final break came, when the princess deserted her royal spouse after he had upbraided and slapped her, following her escape with the Russian minister to Sweden.

## GREAT ELEPHANT BUTTE PROJECT MAKING GOOD PROGRESS; OVER 1,100 MEN NOW ON THE PAY ROLL; EFFICIENCY IS ON THE GAIN

Elephant Butte, N. M., March 28.—Exceptionally favorable weather conditions and plenty of common labor have enabled the work to continue steadily along the lines laid out. While no world's records have been broken, there has been a continual improvement incident to the correction of defects in plant, that could not be detected until tried out under the most severe conditions.

Plant Required Tuning Up. To some it may appear that such a plant should have been designed to work perfectly from the start under every and all conditions. The entire construction plant is novel in this, that it is designed to be as nearly automatic in its operation as possible. Without precedent to profit by it is not strange that certain adjustments are necessary from time to time, as conditions and capacities change. Increased efficiency in one operation may show some other part must be improved to meet this increase. About a week ago it was found that with an unusually large day's output of concrete the cement conveyor would not furnish settlement cement. This has been corrected, but is merely one instance of the "tuning up" that can only be perfected as actual conditions develop new problems.

Masonry Work Progressing. Masonry work has continued uninterrupted throughout the month. During the latter half of February only one cable was used in placing concrete but since March 1, two cables and two mixers, were used. During the two weeks in February 9,500 cubic yards of masonry was placed, an average per day of 520 cubic yards, while the best day's run was 920 cubic yards. During the first half of this month 14,050 cubic yards of masonry was placed, a daily average of 1170 cubic yards, the best day's run being 1500 cubic yards. It is expected that by the end of the month 1500 cubic yards will be the daily average and the best day's run several hundred cubic yards higher.

The total masonry now in place is 128,000 cubic yards. The lower portion of the foundation is entirely covered, a distance of about 400 feet parallel with the axis of the dam. Six derricks are now being used on masonry work, four of them being on the wall and raised every Sunday, while the other two are located at the easterly abutment and some distance above the dam.

To Increase Excavation Force. Since March 1, excavation for foundation has been confined to the west abutment where small gangs, working two shifts, are preparing for masonry just west of flume. Within a few days this force will be considerably increased.

## FORTUNES IN SIGHT IN SILVER FOX FURS

WINNIPEG, Man., March 28.

Furs of the silver fox worth many times their first weight in gold in shops of New York and Chicago will be grown for market this year on a fox farm near Edmonton. That this industry should be started at Wetaskiwin, almost at the threshold of Edmonton, the great primary market for furs, shows what changes have been wrought in the once primeval regions of Peace River, the Athabasca and the McKenzie by the influx of settlers intent on agriculture.

One of the most interesting problems of fox growing is that of undoing what a century of hunting and trapping has done in sharpening the wits of the fox, that it may keep well beyond the reach of man. Whether the silver foxes will retain their fine fur and remarkable acuteness of their intelligence when breeding under half-domesticated conditions of the new fox farm will be an interesting study for naturalists. But some veterans of the fur trade are backing their conviction with \$35,000 that they can produce the skins which sell in London for many times their weight in gold, and when dressed, for fabulous sums in the great centres of Europe and America.

On the Peace River in northern Alberta and in the vicinity of Fort Vermilion, where there is already an agricultural population and an electrical lighted mill, fox pelts are secured in smaller numbers than years ago. With settlers swarming into the Peace River district to begin farming in that particularly fertile region, and with the building of the Canadian Northern railway, the hunters and trappers see the beginning of the end.

But the end is not yet by any means. On January 17 a trapper arrived at Edmonton with \$22,000 worth of live foxes and skins in an automobile. The first transaction of the season represented a deal of \$24,000, which included 11 black foxes, 400 other

## PARIS FASHION HINT

This new creation by Lacroix of Paris is a model of tulle and applique with tulle of black and white lace.

er foxes, 152 mink, 35 lynx and 36 bears.

All the skins are peeled in London where they are distributed in Paris and New York, finding ready markets at \$1,000 upwards. The silver fox is the most valuable, and found at its best near Hudson Bay. The fur is sometimes of a uniform black and shiny color, except at the tip of the tail, which is white, but more usually it has a hoary appearance from the admixture of white tipped hairs with those entirely black.

## INSPIRATION MINE HOIST A TRIUMPH IN ELECTRIC WORK

One of the most important developments of the year 1913 in the application of electricity to mining service consists of the electrically driven automatic hoist recently designed for the Inspiration Consolidated Copper Mining Co., of Miami, says Mining Science. This electrical equipment is designed for the relatively low hoisting speed of 750 feet per minute, and for automatic operation, although an emergency equipment for hand operation is also provided. The hoisting will be done at the rate of 1,000 tons per hour from each of two shafts having a depth of 630 feet. The two balanced hoists are each independently driven by a 750 horsepower, 575 volt direct current motor, to which current is supplied from a flywheel motor generator set consisting of two 500 kilowatt generators driven by a 750 horsepower induction motor. The arrangement of this hoisting service, due to the immense tonnage which can be brought to the surface by the set, and saving in the operation of

## GLASS OF SALTS CLEANS KIDNEYS

If your Back is aching or Bladder bothers, drink lots of water and eat less meat.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking and no doubt you will wonder what became of your kidney trouble and backache—Adv.

large ships, which are automatically supplied to each set at 1,000 volts, and the motors are connected in series. Current for their operation is received from the Victoria Falls & Transvaal Power Co.'s lines at 2,000 volts, and is transmitted to the hoist motors through a motor generator set consisting of two 1,500 kilowatt generators driven by a 5,000 horse power motor. No flywheel is used.

An idea of the service conditions under which these motors operate may be gained from the fact that they hoist eight tons per trip from a maximum depth of 3,540 feet, at a speed of 3,500 feet per minute, which is equivalent to about 40 miles per hour; and during the hoisting cycle the load varies as much as 12,500 horse power in a period of 30 seconds, the maximum positive load reaching 9,000 horsepower.

In view of their unusual size (the total weight aggregating 90 tons), it was necessary to ship these equipments in sections, and to reassemble them at the mines.
